

Electronics/Robotics FIRST FULL WEEK

After the summer assignment you should have an account and have the BlocklyProp client installed on your computer.

Then read through and add vocabulary to your notebook:

<http://ionaphysics.org/lobby/robotics/classroom/outline/Introduction%20to%20Computer%20Programming.pdf>

(Robotics Outline Introduction to computer programming)

Finish for homework.

We will then do the following:

1. Distribute hardware
2. Take inventory
3. Explain the Resistor Color Code and you will copy it into your notebook.
4. We will construct and run our first program
5. Then you will begin Path 1.
